

HOT AND COLD WATER BILLING

IMPORTANT NOTES:

- Two water meters are metering each unit for water consumption. One for hot water and the other for cold water.
- Consumption for both meters combined is used to calculate the total cold water value, calculated at the prescribed municipal tariffs.
These tariffs are available on our website: www.topcharge.co.za.
- Water measured through the hot water meter is also billed at a rate equal to the cost of electricity used to generate each kilo liter of hot water.
- Note that this cost is recalculated each quarter to ensure accurate billing is done on hot water costs.
- Demand levy is billed per unit at the prescribed municipal tariff.

EXAMPLE: For this example, consumption through the cold-water meter was 8 kl and the hot water meter 2kl.

Cost includes 15% VAT.

WATER UNITS USED	UNITS	RATE	TOTAL
Water Units (0-6 kl) Free	6	R0.00	R0.00
Water Units	4	R 34.32	R 137.28
HOT WATER COMPONENT			
Hot Water Units	2	R 92	R 184
DEMAND MANAGEMENT			*To be billed by the Managing Agents
R 74.84 per month			R 74.84
SEWER CHARGES			*To be billed by the Managing Agents
R 412.18 per month			R 412.18
TOTAL BILL			R 808.30

Demand management charge is subject to changes based on municipal cost adjustments.
